

I would like to comment on K-LOVE.

I am a professional mobile DJ/Entertainer in the state of Utah. I am very familiar with a variety of music genre, and in all honesty I am discusted with the content of the lyrics in the R&B, Hip Hop, Grunge, etc... that is being aired over the nations radio stations. What ever happened to censorship? Even these so called radio edits aren't appropriate and still allude to the content of the songs. I waste more time attempting to create wholesome and unoffending playlists for my performances. These offensive songs promote violence, substance abuse, and inappropriate sexual behavior. I know I have a choice in what I play, and I choose not to play these types of offensive songs by people like "Usher", "Lil-Jon", "Ludacris", "Eminem", etc... They are degrading to women and sexually explicit!

As a dedicated listener of K-love I get to hear "Real Music" from "Real Artists". These artists relay a positive message that is unoffensive and promotes christianity. I actually implement these songs into my playlists because I know that I do not have to fear reprocuissions from youth leaders and school administrations regarding lyrical content. K-LOVE is an uplifting station with positive purpose. FCC needs to re-evaluate the censorship rules, and go back 20 years and implement heavy fines to stations who are vulgar, and promote the artists mentioned in the first paragraph.

People need a station like K-LOVE to be able to have positive and uplifting message in the music, not degrading, vulgar, violent, like the "others".

We have a mortal life as a gift from "God" our creator. I am sure he is disappointed and saddened by what is happening with the negative influence music and media is having on society.

It is in the best interest to promote K-LOVE and other stations alike that play contemporary christian to a higher level than R&B, Rap, Grunge, Hip Hop, etc...

Please do not take something positive and encouraging away from us only to replace it with filth.

Sincerely,
Jerry Pierce
